Transparency Watch and the Fight Against Corruption

Issues of corruption are an important concern for any country. Greater transparency and low levels of corruption provide citizens with better government services and a government which is responsible in front of the citizens.

A crucial aspect of EU accession for Macedonia as well as promoting international trade is showing positive data trends in abating corruption incidents. The Transparency Watch (Macedonia) project is an avenue to shed light on these issues toward achieving valuable trends.

The Transparency Watch project in Macedonia is the first of similar planned efforts in Europe and the world.
